

Steel strapping cutter tools are the simplest and most basic method of cutting steel strapping.

## High Tensile Steel Strapping Cutter - 2"

For heavy duty operations we recommend this manual durable tool with two long handles. The two handed cutter allows cutting steel strapping with minimal effort.

High tensile tools are recommended for .015 to .044 tensile, or thickness of steel strapping. For cutting strapping width 3/8 to 2"

All steel construction ensures long lasting life of the tool
